PROFESSIONAL SUMMARY

- Business and Data Analytics Professional with 7+ years of experience transforming complex datasets into actionable business insights and measurable performance improvements.
- Data Visualization Expert skilled in designing corporate KPI reporting frameworks and interactive dashboards for leadership and stakeholders.
- Technical Competency in building ETL pipelines and automating workflows to improve data quality and reporting efficiency.
- Cross-Functional Collaborator experienced in gathering complex business requirements from stakeholders, analyzing project agreements, and translating technical findings into practical strategic recommendations.

TECHNICAL SKILLS

- BI and Reporting: Power BI (DAX, Power Query, data modeling), Tableau, Advanced Excel (PivotTables, Power Query), KPI reporting, executive dashboards
- Data and Programming: SQL (joins, CTEs, window functions), Python (Pandas, Flask), ETL and data transformation, workflow automation, REST APIs, SAS
- Advanced Analytics: Predictive analytics, statistical modeling, data mining, trend analysis
- Business**:** Requirements gathering, process optimization, business process mapping, SLA assessment, UAT and implementation, stakeholder engagement
- Tools**:** Microsoft D365, SharePoint, Confluence, GitHub, Render

EDUCATION

MBA, Concentration in Financial Management (Online) Oct 2025 - Expected Dec 2026
Carleton University • Ottawa, Ontario

Post-Graduate Certificate in Business Analytics Sep 2021 - Apr 2022
Seneca Polytechnic College • Markham

Bachelor of Arts in Business Administration Sep 2010 - Feb 2015
Al-Balqa Applied University • Salt, Jordan

WORK EXPERIENCE

Business Assurance and Transformation Analyst Jun 2023 - Mar 2025
EllisDon Corporation • Mississauga, Ontario

- Coordinated with leadership teams to create and improve performance monitoring reports for Public Private Partnership (P3) contractual requirements, enabling agile ad hoc reporting and reducing operational costs associated with additional reporting requests.
- Developed and optimized ETL workflows and Power BI dashboards, integrating government weather data and other sources to accelerate data collection, improve trend analysis, and ensure accurate and efficient monthly, quarterly, and annual energy reporting.

- Identified data inaccuracies across multiple databases and supported the move toward in-house operations, helping reduce risk by ensuring insurance compliance, lowering contractor costs, and streamlining overall compliance processes.
- Collaborated in building a Flask-based tool for monitoring construction and maintenance compliance, improving quality assurance and service level agreement compliance.
- Automated customer satisfaction survey distribution and data retrieval processes, eliminating repetitive manual tasks and improving reporting efficiency.
- Supported the implementation of new site computerized maintenance management system (CMMS) software, validating and testing data in a testing environment to ensure accurate capture and reporting metrics.

Performance and Marketplace Operations Lead Mar 2017 - May 2023
Uber (Careem Networks) • Amman, Jordan

- Led driver compliance project following Careem's licensing approval by overseeing permit workflows, integrating databases with performance systems, and prioritizing high-performing drivers while ensuring full regulatory compliance.
- Supported the launch of scooter delivery services by evaluating driver performance and collaborating with third-party partners to implement installment plans, enabling market entry and expanding the business model.
- Analyzed complex quantitative datasets and automated reporting to support business decision-making across multiple verticals.
- Improved service reliability by managing peak-hour demand programs and monitoring driver performance using custom-built dashboards and analytical queries.
- Processed large-scale GPS and geo-location data to identify high-density zones and design geo-fenced in-app pick-up points, improving rider experience and increasing trip efficiency.
- Independently defined operational problems and applied data-driven solutions while collaborating across multiple verticals and stakeholders.

Personal Project: Invoice and Vendor Management Web Application
Python • Flask • REST APIs • Render

Live demo: https://project-one-ofo6.onrender.com
Portfolio: https://tareqhaboukh.github.io

- Designed, developed, and deployed a full-featured Flask web application hosted on Render.
- Implemented dynamic modules for user management, invoice tracking, vendor handling, dashboards, AI chat assistant, and API endpoints.
- Developed RESTful APIs to enable data access and integration with external tools.
- Integrated AI-powered chat to answer questions and provide insights based on application data.
- Enabled structured invoice PDF parsing to automate data extraction and streamline workflows.
